

PRE-1701 ENGLISH BOOKS IN THE NATIONAL LIBRARY OF AUSTRALIA

THE NATIONAL LIBRARY OF AUSTRALIA almost certainly holds the largest collection of sixteenth- and seventeenth-century English books in Australasia. Books printed before 1641 form, in particular, very significant parts of the De Vesci and Clifford collections (the latter consisting chiefly of Roman Catholic material); while for the Wing period the largely literary David Nichol Smith collection, acquired in 1962, has provided a very large nucleus around which to build. Other STC and Wing holdings are scattered among a variety of collections in the Rare Books Collection of the Library. Some information about the scope and provenance of these is available in C.A. Burmester's valuable *Guide*¹, and it is not intended here to repeat, or to expand on, the outlines which he gives.

What follows is a listing of the National Library's holdings, arranged for the pre-1641 period by STC number and for 1641-1700 by Wing number. In the first list, references are to:

A.W. Pollard and G.R. Redgrave, *A short-title catalogue of books printed in England, Scotland & Ireland and of English books printed abroad 1475-1640* (London, 1926).

Certain insert numbers (recognisable by their decimal points) in the sequence from 14045.5 onwards refer to volume 2 of the second edition (revised and enlarged by W.A. Jackson and F.S. Ferguson, completed by K.F. Pantzer, London, 1976). In the Wing list, references are to:

Donald Wing, *Short-title catalogue of books printed in England, Scotland, Wales, and British North America and of English books printed in other countries 1641-1700* (3 vols., New York, 1945-51)

and on occasion in the sequence A-O to the second edition, Vols. I and II (New York, 1972-82).

We would stress that we have not, in the main, undertaken a first-hand examination of the 2,500 or so items for which we give numbers; what is offered here is essentially an aggregation of work done by a number of other people in the past, not much of which has been made public before now. We have gratefully incorporated the Wing numbers for the 320-odd items from the National Library which W.J. Cameron listed in his *Short-title catalogue of books printed in Britain and British books printed abroad 1641-1700 held in Australian libraries* (Sydney, 1962). To these it has been possible to add numbers for some 1,900 items noted by Helen Blackall, Lorraine Bryant and Ivan Page in the late 1960s. Their primary aim was the incorporation of these items in the HPB Project, based at the School of Library and Information Science, University of Western Ontario, and secondarily the publication of periodic lists of addenda to Cameron in the *Australian Library Journal* — few of which appeared. The same staff members are responsible for most of the 360 STC numbers which we list. Since then, vol. II (I-Z) of the

revised STC has appeared, and so have vols. I and II (A–O) of the revised edition of Wing. It is a significant reflection on vol. II of the revised STC especially that it has been possible, this time round, to reduce the Library's 'not in STC' list to five items only, from a considerably larger number noted in the 1960s: and four of those five are in the A–H sequence. Similar credit goes to vol. II (E2927 — P) of the revised Wing; to a much lesser extent to the revised Wing vol. I. The enumerative problems for the 1641–1700 period are more complex than for STC, since numbers in the two editions of Wing by no means always coincide, and the necessary schedule of changed numbers has so far been published for the A–E2926 sequence only (in the revised vol. II, p.669–90). Unless otherwise stated, Wing numbers listed below are based on the *first* edition; between A and E2926 reference may need to be made to the schedule mentioned. Numbers listed here which are not found in the first edition refer of course to the second. Enquiries about other ambiguities should be addressed to the Rare Books Librarian at the National Library. All this is to say that we have not re-checked all 1,400 instances where the risk of non-correlation occurs. In indicating variants we have (being acquainted with Wing's characteristic kinds of inconsistency) been fairly conservative and have noted only the most glaring discrepancies.

We hope that, despite these limitations, the lists will serve a useful purpose. It is thought that they represent about eighty-five per cent of the National Library's current holdings of pre-1701 English books.
